

(Quality You can Stand on)

Thank you for choosing Boicebox Pedalboards, Inc. for your pedal board needs. Your Boicebox GB-21 padded gig bag is made in the USA specifically for the T-21 series Tiered pedal boards.

It has a double zipper and opens clam shell style to make for easy stowing and removal of your pedal board.

For best results, put front face (narrow) of pedal board into bottom of gig bag first. Make sure front of board is snug and in side bag at both corners and then lower back of board making sure both rear corners slide into rear part of bag. Remember: top of bag is the part that has the pocket and label. Bag can be cleaned with a damp cloth. Make sure zippers are closed before transporting your pedal board

**Thanks again for choosing Boicebox!**
