

(Quality You can Stand on)

Thank you for choosing Boicebox Pedalboards, Inc. for your pedal board needs. Your Boicebox SC-CL(21) Clear Vinyl slip cover is made in the USA specifically for use with the **Boicebox T-21HT Tiered** pedal board with integral hard top cover.

To use the SC-CL (21) simply place the T-21HT in the up right (carry) position [**It naturally sits on the 4 foot pads that are located on the bottom of the pedal board when it is in this position ... carry mode feet**] slide the bag over the pedal board making sure to line up the corner seams of the bag with the corners of the box (fig.1). As you slide the bag down over the box you may have to help it over the foot pads on the back of the box [**these are the feet for the pedalboard when it is in performance mode ... performance mode feet**]. When top of bag is in contact with top of box. Wrap flap underneath box between (**carry mode**) feet and connect Velcro to secure (fig.2)

(fig.1)

(fig.2)

The SC-Cl clear vinyl slip cover will get easier to slide on after it is used a couple of times and works best at room temperature (it's a bit stiff when cold). The slip cover can be cleaned with a damp cloth.

Don't forget that the Slip Cover is a great place to store your T-21HT 'top' when performing (fig.3)

(fig.3)

Thanks again for choosing Boicebox!
